

DISQUS SERIES

Glare Free Parking Garage Luminaire

Next Level Visual Comfort

With both pedestrians and vehicles using the same space in a parking garage, it is essential to create a safe environment and unrestricted lighting to all areas. The SLI Disqus Series visually comfortable parking garage luminaire, is designed to minimize glare and save money with its built in smart controls, making it the premier solution to effectively and efficiently illuminate an entire parking garage

Visually Enhanced Design

The smooth curved polycarbonate lens design of the Disqus Series reduces glare and distraction for drivers and pedestrians alike. Using high count LED technology, this round, aesthetically pleasing luminaire further reduces glare by diffraction of light using a specialised Fresnel optic lens creating a more uniform and visually comfortable environment.

Specialized Optics

Offering specialized optics, the SLI Disqus Series is the most complete package for parking garage projects. Not only is light directed light downward on the work plane but also sideways across the roof eliminating dark spots and providing uniform illumination. Remove the Fresnel lens and the Disqus Series can be doubled-up as a low bay fixture

Energy Savings Done Smart

With its one piece die cast, corrosion-resistant ADC12 aluminium housing, the SLI Disqus keeps both the LEDs and LED drivers running cool, allowing it to deliver over 120 LPW even at its highest lumen package configuration. This outstanding performance translates into 80% energy savings when replacing 150W metal halide. Greater energy savings can be had by combining the microwave sensor linkage control option. The SLI Disqus Series also qualifies for DLC, allowing end users to maximize utility rebates. The result is significant energy savings and maximum rebate dollars offering a quick payback period of fewer than three years and a substantial return on investment.

Performance Summary:

- Glare reducing optics
- Downwards and sideways distribution
- 4,800 – 12,000 lumen packages
- Up to 120 LPW
- IP65 vandal resistant PC lens
- Integrated motion sensor and control options
- Replaces 150W+ MH luminaires
- 12 years (100,000+ hours) expected service life
- Up to 120 LPW
- DLC qualified product and eligible for utility rebates
