

# CASPIAN SERIES

Ingrade Uplight

**Applications:** Building perimeters, bars & shopping malls, corporate offices building facades & entrances architectural

## PERFORMANCE SUMMARY

With enough impact resistance to withstand both foot and vehicle traffic, the Caspian Inground LED Floor Fitting is available in three sizes and can be fitted with a wide range of optics (symmetrical, asymmetrical, fixed or adjustable beam reflectors) trims or housings, depending on different light engineering and installation requirements.

## Construction

- Durable extruded die cast aluminium housing
- Thermal shock resistant glass lens cover rated to 4,400lbs/20mph
- High impact protection rating (IK10) protects from acts of vandalism
- Elegant marine grade stainless steel trim
- 113°F surface touch temperature

## Optics

- Glare reducing baffle option
- Wash model in both wide and narrow asymmetric beam for ingrade wall lighting applications
- 15° manual lens tilt
- CRI: RA80

## Electrical

- 240V or 24V DC RGB colour changing option, with inbuilt driver interface to DMX decoding system
- Volts: AC100-277V or 24V DC
- Environment Location: IP67
- Average Rated Life: 100,000hrs
- Ambient Temp: -4°F to 113°F

## DIMENSIONS

## INSTALLATION INSTRUCTIONS

- (1) Open the package, remove the fixture, preinstall box, accessory and wrench. Two SS screws screwed on aluminum cover of fixture are used to fix the SS face plate
- (2) Connect the fixture's wiring with main power correctly, the joint of connection must be waterproofed
- (3) After connection, power all fixtures on to test if they work well in case of any faults
- (4) Place the preinstall box into the pre dug hole, secure the fixture to box with screws, repeat for all
- (5) Loosen the two screws on aluminum cover and secure the SS face plate tightly on the fixture
- (6) Customized installations maybe different depending on the product specification

## Safety

- Before the fixture is connected, carefully check the input voltage, so as not to cause damage to the system
- The installation and removal of lamps require a professional technical personnel to operate.
- When opening the package, please check if there are signs of damage prior to installation
- During installation turn off power not to get an electric shock.
- This product can only be installed in dry or sunny weather.
- Do not open or tamper with original fixture structure to avoid light leakage and void warranty
- Fixture with broken glass should be immediately replaced
- It is recommend adding an additional IP67 protection layer to buried lamp area for additional waterproofing to avoid long-term immersion in water.
- Terminations and on-site power supply cable connection needs to be IP68 so not to affect the normal operation of the fixture
- Choose correct power supply according to product specifications, voltage and cabling. Do not share LED with metal halide lamp, sodium and motors on the same power supply circuit
- Fixtures are not recommended to be installed in seaside, corrosive, or chemical areas not to cause corrosion of lamps or internal construction
- Refer to the stainless steel maintenance instructions for preservation of the stainless steel flange
